

A natural lighting solution

The **perfect alternative** for your next commercial project

Topglass® Fibreglass Roofing is the perfect material for commercial applications where chemicals are in use, as it will not deteriorate over time. It also offers excellent UV protection as well as a natural lighting solution.

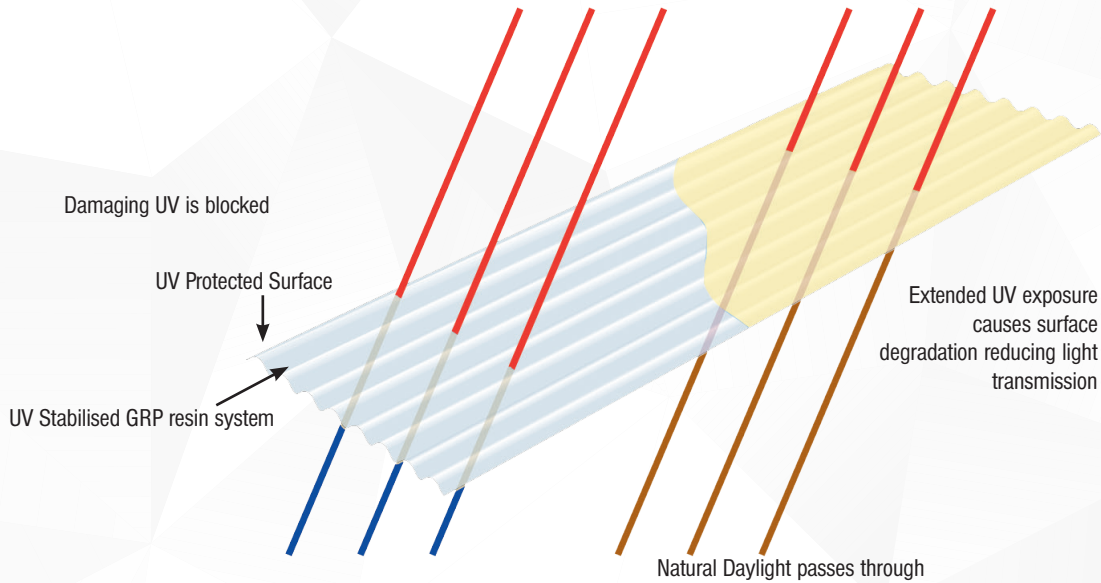

Topglass® is also available in a range of finishes that will accommodate any industrial project that you have. It can be supplied in solid colours providing an excellent alternative to metal roofing and cladding systems in corrosive environments.

What can it be used for?

Topglass® is perfect for commercial, industrial, institutional and other projects where long-term, high quality lighting is required. Other applications include: Schools and public outdoor areas requiring UV protection.

A natural lighting solution
