

Custom Glaze™, like other Polycarbonate Sheets may be affected by certain substances that can cause surface cracks.

Custom Glaze™ is resistant to the below chemicals:

- Mineral Oil
- Ethanol
- Toluene
- Soft PVC Rubber (dioctyl phthalate)
- EPDM Rubber

However, it can be damaged by:

- Acetone
- Ammonia
- Methanol
- Sodium Hydroxide

### General Cleaning

Clean the installed sheet on a regular basis. Laserlite Building Products recommends cleaning Custom Glaze™ every 6 months with a soft sponge or microfibre cloth with a mild soap that doesn't contain any of the damaging ingredients listed above, such as dish soap. Not only will it keep it looking its best, it will ensure that the UV-Resistant surface remains long-lasting.

### Cleaning DO's and DON'Ts

#### DO

- ✓ Wash with a mild soap
- ✓ Use a soft sponge
- ✓ Rinse the cloth or sponge and change water often
- ✓ Rinse with lukewarm water

#### DON'T

- ✗ Scrub
- ✗ Use harsh brushes, scourers or squeegees
- ✗ Use abrasive cleaners
- ✗ Use thinners or Methylated Spirits
